Odiya,hindi,english (Full Professional)

Certifications

DevOps Foundations: Microservices

Building Real-Time Web Apps with Spring Boot and WebSockets

Developing Microsoft Azure and Web Services

React: Working with APIs

React: Using TypeScript

Arat Rana

Lead Software Engineer | Spring Boot. Java. Micro services. Scalable distributed system | React JS | Node Js

Hyderabad, Telangana, India

Summary

Lead Engineer with extensive experience designing scalable enterprise applications, distributed processing platforms, REST APIs and cloud-ready integrations. Proven ability to translate complex business requirements into resilient technical architectures, improve application performance, modernize legacy platforms and guide engineering teams. Strong hands-on background across Java, Spring Boot, microservices, web technologies, messaging and cloud migration.• Architected and developed integration services and REST APIs supporting real-time data exchange, workflow automation and scalable enterprise integrations.• Redesigned distributed processing architecture using event-driven patterns to improve large-scale processing performance, maintainability and operational resilience.• Designed scalable, distributed and cloud-ready backend solutions with emphasis on performance optimization, maintainability and fault tolerance.• Architected REST and SAML-based integrations for OpenText WebReports, enabling secure real-time enterprise data exchange and automation workflows.• Led adoption of open-source tooling to replace licensed components, reducing operational cost and simplifying application dependencies.• Defined high-level and low-level architecture, secure coding standards and technical design practices for enterprise applications.• Served as a Subject Matter Expert for application architecture, troubleshooting and security remediation while mentoring engineers and driving technical excellence.• Partnered with cross-functional Agile teams to deliver scalable, extensible solutions and support technology adoption initiatives.• Designed and architected a scalable single-page application for real-time supply chain analytics, improving data visibility for business stakeholders.• Architected the 'Redriver' analytics dashboard to provide at-a-glance visibility into key supply-chain performance indicators.• Built responsive, data-driven UI capabilities using React.js, Spring Boot and Node.js, integrated with multiple backend services.• Designed modular widgets that consolidated real-time data from Enterprise Supply

Planning, Demand Forecasting and other products.• Developed backend services for widget configuration, user sessions and real-time data feeds using Spring Boot and Node.js.• Led migration from EJB to Spring Beans, improving application performance, maintainability and modernization readiness.• Transitioned application deployments from WebLogic/WebSphere to Tomcat, improving server efficiency and operational reliability.

Experience

OpenText
Lead Software Engineer
August 2023 - Present (3 years 3 months)
Hyderabad, Telangana, India

Blue Yonder
6 years 5 months

Senior Technical Architect
April 2021 - August 2023 (2 years 5 months)
India

Technical Architect at Blue Yonder
April 2017 - March 2021 (4 years)
Hyderabad, Telangana, India

ADP
Senior Member Technical
October 2015 - April 2017 (1 year 7 months)
Hyderabad Area, India

Java/J2ee, spring, hibernate, spring oauth, spring mvc, spring webflow, rest webservices, jsp, jstl, bootstrap,jquery,struts,ldap,oracle in HCM domain

HCL Technologies
Lead Engineer
September 2010 - October 2015 (5 years 2 months)
Greater Hyderabad Area

Education

Biju Patnaik University of Technology, Odisha

Master In Computer Applications - MCA, Computer Programming · (June 2005 - June 2008)
